Playback

Basic operation
- Turning the power on 30
- Selecting the input source 30
- Adjusting the volume 31
- Turning off the sound temporarily 31

Listening to Internet Radio
- Listening to Internet Radio 32
- Playing the last played Internet Radio station 34
- Using vTuner to add Internet Radio stations to favorites 35

Playing back files stored on a PC and NAS
- Applying media sharing settings 37
- Playing back files stored on a PC and NAS 38

Favorite function
- Registering stations or files to the favorites list 41
- Calling stations or files from the favorites list 41
- To switch between registered stations and files during playback 41
- Deleting stations or files from the favorite list 41

Playing an iPod
- Listening to music on an iPod 43
- Setting operation mode (“On-Display” mode) 44
- Charging the iPod/iPhone 45

Playing a USB memory device
- Playing files stored on USB memory devices 47

Listening to music on a Bluetooth device 49
- Playing music from Bluetooth device 50
- Pairing with other Bluetooth devices 52
- Reconnecting to this unit from a Bluetooth device 53
- Connecting a Bluetooth device with the NFC function via NFC 54

Listening to DIGITAL IN 55
Listening to ANALOG IN 55

AirPlay function 56
- Playing songs from your iPhone, iPod touch or iPad 57
- Playing iTunes music with this unit 57
- Selecting multiple speakers (devices) 58

Spotify Connect function 59
- Playing Spotify music with this unit 59

Remote play function 60
- Settings required for each device 61

Web control function 63
- Controlling the unit from a web control 63

Convenience functions 67
- Adjusting the tone 68
- Sleep timer function 69
- Switching the display’s brightness 69

</tbody>
</table>
Inserting the batteries

1. Remove the rear lid in the direction of the arrow and remove it.

2. Insert two batteries correctly into the battery compartment as indicated.

3. Put the rear cover back on.

NOTE
- To prevent damage or leakage of battery fluid:
  - Do not use a new battery together with an old one.
  - Do not use two different types of batteries.
  - If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.

Operating range of the remote control unit

Point the remote control unit at the remote sensor when operating it.
Features

High quality sound

- **Equipped with a high-quality class D amplifier**
  The amplifier section incorporates DDFA® technology from CSR. The output stage circuit has a discrete construction which realizes higher S/N and lower distortion compared to conventional class D amplifiers. Additionally, the high 70 W / 4 Ω/ohms output which exceeds the size of the housing lets you enjoy Denon’s ideal audio playback environment that delivers “delicate yet powerful sound”.
  The DDFA® mark and the DDFA logo are trademarks of CSR plc or one of its group companies and may be registered in one or more jurisdictions. The CSR logo is a trademark of CSR plc or one of its group companies.

- **Advanced AL32 Processing**
  Equipped with Advanced AL32 Processing, Denon’s unique analog wave reproduction technology. Reproducibility of weak signals is increased by expanding the 16-bit digital data to 32 bits.

Multiple music formats are supported, all in a compact form factor

- **Supports Internet Radio and music streaming**
  Supports AirPlay® (p. 56)
  You can enjoy a wide variety of content, including listening to Internet Radio, playing audio files stored on your PC.
  This unit also supports Apple AirPlay which lets you stream your music library from an iPhone®, iPad®, iPod touch® or iTunes®.

- **DLNA (Digital Living Network Alliance) ver. 1.5 support for audio networks**

- **Supports Spotify Connect**

- **Support for High Quality Audio playback**
  WAV/FLAC/ALAC (Apple Lossless Audio Codec)/AIFF/DSD

- **Support for Gapless playback**
  Playback with no gap between music files (for WAV/FLAC/ALAC/ AIFF/DSD only).

- **Wi-Fi network capability with diversity antenna, and is certified under WMM (Wi-Fi Multi Media) for efficient wireless connectivity**
**Easy operation**

- Easy wireless connection is possible by pressing the Wi-Fi CONNECT button (WPS and Wi-Fi Sharing)
  See the separate “Quick Setup Guide”.

- Wireless connection with Bluetooth devices can be carried out easily
  You can enjoy music simply by connecting wirelessly with your smartphone, tablet, PC, etc.

- If the Bluetooth device has NFC function, you can connect easily to touch to N mark

- iPod auto detect charges your device even after the unit switches to standby mode

- “Denon Hi-Fi Remote” is application software that allows you to perform basic operations with an iPad, iPhone, Android smartphone or Android tablet such as turning the unit ON/OFF, controlling the volume, and switching the source
  * Download the appropriate “Denon Hi-Fi Remote” for your iOS or Android devices. This unit needs to be connected to your LAN and the iPad, iPhone, Android smartphone, Android tablet or other device needs to be connected to the same network by Wi-Fi (wireless LAN).

- OLED (Organic Light Emitting Diode) display that can display 3 lines

- Auto Standby mode for energy savings
Part names and functions

Front panel

1. Power button
2. Remote control sensor
3. Function buttons
4. Information display
5. Input selector
6. Volume control
7. USB port
8. AUX input
9. Headphone jack
10. Front panel jack
11. Remote control unit
1 Power operation button (dB)
   Turns power to this unit on and off (standby).

2 Power indicator
   The power indicator changes as shown below according to the status of the unit.
   - Power on : Off
   - Normal standby : Off
   - When “Network Control” is set to “On” : Red (p.81)
   - iPod charge standby : Red (p.45)

3 N mark (N)
   Touch this mark with a Bluetooth device that includes the NFC function when pairing (registering) with it. (p.54)

4 Playback/Pause/Enter button (ENTER)
   Plays back and pauses tracks, and enters the selected content.

5 Display
   Various information is displayed here.

6 Volume control knob
   This adjusts the volume level.

7 USB port (←→)
   Used to connect iPod or USB memory devices. (p.23)

8 Headphones jack
   Used to connect headphones.
   When the headphones are plugged into this jack, audio will no longer be output from the speaker terminals, SUBWOOFER OUT connector and AUDIO OUT connectors.

   NOTE
   - To prevent hearing loss, do not raise the volume level excessively when using headphones.

9 Input source select button (₂)
   Selects the input source.

10 Cursor buttons (Δ, ▽, ◀, ▶)
    These select items.

11 Remote control sensor
   This receives signals from the remote control unit. (p.6)
Rear panel
1. **Speaker terminals (SPEAKERS)**
   Used to connect speakers. (p. 17)

2. **SUBWOOFER OUT connector**
   Used to connect a subwoofer with a built-in amplifier. (p. 18)

3. **DIGITAL IN connectors**
   Used to connect devices equipped with digital audio connectors.
   - “Connecting a digital device (Optical)” (p. 20)
   - “Connecting a digital device (Coaxial)” (p. 21)

4. **AC inlet (AC IN)**
   Used to connect the supplied power cord. (p. 28)

5. **AUDIO OUT connectors**
   Used to connect devices equipped with analog audio inputs connectors or an external pre-main amplifier. (p. 22)

6. **Wi-Fi connect buttons (iOS/WPS)**
   Used to connect to the wireless LAN.
   (See the separate “Quick Setup Guide”.)

7. **NETWORK connector**
   Used to connect this unit to the network. (p. 25)

8. **ANALOG IN connectors**
   Used to connect devices equipped with analog audio connectors.
   (p. 19)

9. **Bluetooth/wireless LAN antenna connectors**
   Used to connect the included external antennas for Bluetooth/wireless connectivity when connecting to a network via wireless LAN, or when connecting to a handheld device via Bluetooth. (p. 26)
1. Place the external antennas for Bluetooth/wireless connectivity evenly over the screw terminal of rear.
2. Turn clockwise until the antennas is fully connected.
3. Rotate the antenna upwards for best reception.
Remote control unit

1 Remote control signal transmitter
   This transmits signals from the remote control unit. (p. 6)

2 SLEEP button
   This sets the sleep timer. (p. 69)

3 Input source select buttons
   These select the input source. (p. 30)

4 System buttons
   These perform playback related operations.
   Channel buttons (CH +, –)
   These operate the Favorite function. (p. 40)

5 TONE button
   Adjusting the tone. (p. 68)

6 FAVORITES ADD / CALL buttons
   • To add radio stations or files to the favorite list, press the ADD button. (p. 41)
   • To call up a radio station or file registered in the favorite list, press the CALL button. (p. 41)
7 TOP MENU button
To back to the top of the menu. (p. 73)

8 Cursor buttons (△▽◁▷)
These select items.

9 ENTER button
This determines the selection.

10 SEARCH button
This displays the search menu.

11 Number buttons (0 – 9, +10)
These enter letters or numbers into the unit.

12 RANDOM button
Switches the random playback.

13 REPEAT button
Switches to the repeat playback.
13 POWER button (Ø)
This turns the power on/standby. (p. 30)

15 VOLUME buttons (▲▼)
These adjust the volume level. (p. 31)

16 Information button (INFO)
This switches display items such as the artist name and album name in the playback screen.

17 MUTE button (●X)
This mutes the output audio. (p. 31)

18 SETUP button
The setting menu is displayed on the display. (p. 73)

19 CLEAR button
This cancels the settings.

20 DIMMER button
Adjust the display brightness of this unit. (p. 69)

21 MODE button
This switches the operation mode.
Cables used for connections

Provide necessary cables according to the devices you want to connect.

</tbody>
</table>

NOTE

- Do not plug in the power cord until all connections have been completed.
- Do not bundle power cords with connection cables. Doing so can result in noise.
Speaker connection

Here we connect the speakers in the room to this unit. This section explains how to connect them using typical examples.

**NOTE**
- Disconnect this unit’s power plug from the power outlet before connecting the speakers. Also, turn off the subwoofer.
- Connect so that the speaker cable core wires do not protrude from the speaker terminal. The protection circuit may be activated if the core wires touch the rear panel or if the + and - sides touch each other. (“Protection circuit” (p. 114))
- Never touch the speaker terminals while the power cord is connected. Doing so could result in electric shock.
- Use speakers with an impedance of 4 – 16 Ω/ohms.

### Connecting the speaker cables

Connect the speaker cable to the + speaker terminal (red) and the - speaker terminal (black).

1. Peel off about 10 mm of sheathing from the tip of the speaker cable, then twist the core wire tightly.

2. Turn the speaker terminal counterclockwise to loosen it.

3. Insert the speaker cable’s core wire to the hilt into the speaker terminal.

4. Turn the speaker terminal clockwise to tighten it.
Connecting the subwoofer

Use a subwoofer cable to connect the subwoofer.
Connecting an analog device

You can connect this unit to various devices with analog audio output.
Connecting a digital device (Optical)

You can connect this unit to devices with digital audio output.

**NOTE**

- Linear PCM signals with a sampling frequency of 32 kHz, 44.1 kHz, 48 kHz, 88.2 kHz, 96 kHz, 176.4 kHz, or 192 kHz can be input into this device.
- Do not input signals other than linear PCM signals, such as Dolby digital, DTS, AAC etc. into this device. Doing so may cause noise, which may cause damage to the speakers.
Connecting a digital device (Coaxial)

You can connect this unit to devices with digital audio output.

**NOTE**

- Linear PCM signals with a sampling frequency of 32 kHz, 44.1 kHz, 48 kHz, 88.2 kHz, 96 kHz, 176.4 kHz, or 192 kHz can be input into this device.
- Do not input signals other than linear PCM signals, such as Dolby digital, DTS, AAC etc. into this device. Doing so may cause noise, which may cause damage to the speakers.
Connecting an amplifier

You can connect this unit to various devices with analog audio input.

- Volume adjustment for the analog audio output can be switched between “Variable” and “Fixed”. (☞ p. 77)
Connecting an iPod or USB memory device to the USB port

- To connect an iPod/iPhone to this unit, use the USB adapter cable that was supplied with the iPod/iPhone.
- For operating instructions, see “Playing an iPod” (p. 42) or “Playing files stored on USB memory devices” (p. 47).

**NOTE**

- Denon does not guarantee that all USB memory devices will operate or receive power. When using a portable USB hard disk drive (HDD) which came with an AC adapter, use that device’s supplied AC adapter.

**NOTE**

- USB memory devices will not work via a USB hub.
- It is not possible to use this unit by connecting the unit’s USB port to a PC via a USB cable.
- Do not use an extension cable when connecting a USB memory device. This may cause radio interference with other devices.
Supported iPod/iPhone models

- iPod classic
  - iPod classic 80GB
  - iPod classic 160GB (2007)
  - iPod classic 160GB (2009)

- iPod nano
  - iPod nano 3rd generation (video)
    - 4GB 8GB
  - iPod nano 4th generation (video)
    - 8GB 16GB
  - iPod nano 5th generation (video camera)
    - 8GB 16GB
  - iPod nano 6th generation
    - 8GB 16GB
  - iPod nano 7th generation
    - 16GB

- iPod touch
  - iPod touch 2nd generation
    - 8GB 16GB 32GB
  - iPod touch 3rd generation
    - 32GB 64GB
  - iPod touch 4th generation
    - 8GB 16GB 32GB 64GB
  - iPod touch 5th generation
    - 16GB 32GB 64GB

- iPhone
  - iPhone 3G
    - 8GB 16GB
  - iPhone 3GS
    - 8GB 16GB 32GB
  - iPhone 4
    - 8GB 16GB 32GB
  - iPhone 4S
    - 16GB 32GB 64GB
  - iPhone 5
    - 16GB 32GB 64GB
Connecting to a home network (LAN)

You can connect this unit to your home network (LAN) to perform various types of playbacks and operations as follows.

- Playback of network audio such as Internet Radio and from your music server(s)
- Playback of music content from online streaming services
- Using the Apple AirPlay function
- Operation on this unit via the network
- Firmware Update

For connections to the Internet, contact an ISP (Internet Service Provider) or a computer shop.
Wireless LAN

With this unit, it is possible to use the DHCP and Auto IP functions to make the network settings automatically.

When using this unit with the broadband router’s DHCP function enabled, this unit automatically performs the IP address setting and other settings. When using this unit connected to a network with no DHCP function, make the settings for the IP address, etc., at “Network”. (p. 81)

When using this unit, we recommend you use a router equipped with the following functions:

- Built-in DHCP server
  This function automatically assigns IP addresses on the LAN.
- Built-in 100BASE-TX switch
  When connecting multiple devices, we recommend a switching hub with a speed of 100 Mbps or greater.
- Use only a shielded STP or ScTP LAN cable which is easily available at electronics stores. (CAT-5 or greater recommended)
- The normal shielded-type LAN cable is recommended. If a flat-type cable or unshielded-type cable is used, other devices could be affected by noise.
- When using a WPS (Wi-Fi Protected Setup) compatible router, you can connect easily to Wi-Fi by pressing the Wi-Fi CONNECT button (WPS) on this unit. (See the separate “Quick Setup Guide”.

Internet
Modem
To WAN side
Router with access point

Router with access point
NOTE

- The types of routers that can be used depend on the ISP. Contact your ISP or a computer shop for details.
- This unit is not compatible with PPPoE. A PPPoE-compatible router is required if you have a contract for a type of line set by PPPoE.
- Do not connect a NETWORK connector directly to the LAN port/ Ethernet connector on your computer.
- Do not carry this unit by the antenna.
Connecting the power cord

After completing all the connections, insert the power plug into the power outlet.

Power cord (supplied) to household power outlet (AC 230 V, 50/60 Hz)

Basic operation

Turning the power on

1. Press POWER \(\bigcirc\) to turn on power to the unit.

- You can also switch the power to standby by pressing \(\bigcirc\) on the main unit.

Selecting the input source

1. Press the input source select button to be played back.

   The desired input source can be selected directly.

- Press OPTICAL again to switch between Optical 1/2.
- You can also select the input source by pressing \(\bigcirc\) on the main unit.
Adjusting the volume

1 Use VOLUME ▲▼ to adjust the volume.
   The volume level is displayed.

   • You can also adjust the volume by turning the volume control knob on the main unit.

Turning off the sound temporarily

1 Press MUTE 孖。
   “MUTING” appears on the display.

   • To cancel mute, either adjust the sound volume or press MUTE 孖 again.
Listening to Internet Radio

- Internet Radio refers to radio broadcasts distributed over the Internet. Internet Radio stations from around the world can be received.
- The broadcast station types and specifications supported by this unit for playback are as follows.
  - WMA
  - MP3
  - MPEG-4 AAC
Listening to Internet Radio

This unit memorizes the last played Internet Radio station. If you press INTERNET RADIO to switch to the Internet Radio function from another input source, the last Internet Radio station you listened to is played.

1 Prepare for playback.
   - Check the network environment, then turn on this unit’s power. (p. 25)

2 Press INTERNET RADIO.

3 Use △▽ to select the you want to play, then press ENTER.

   | Country name : | Displays typical Internet Radio stations. |
   | Search Stations : | Displays all Internet Radio stations that this unit can tune in to. |
   | Search Podcasts : | Displays Internet Radio stations in the podcasts that this unit can tune in to. |

4 Use △▽ to select the station, then press ENTER.
   Playback starts once buffering reaches “100%”. 

   | Recommended Stations : | Displays recommended Internet Radio stations. |
   | radiodenon.com: | Displays Internet Radio stations added to favorites in vTuner. For instructions on how to add to favorites in vTuner, see “Using vTuner to add Internet Radio stations to favorites” (p. 35). |
   | Recently Played : | Displays recently played Internet Radio stations. Up to 20 stations can be stored in “Recently Played”. |
   | Search by Keyword : | Displays Internet Radio stations searched by keyword. For character input, see “Inputting characters” (p. 74). |
Playing the last played Internet Radio station

1. Press INTERNET RADIO.

   The source switches to "Internet Radio" and the last played radio station plays.

Any characters that cannot be displayed are replaced with "." (period).

NOTE

- The radio station database service may be suspended or be otherwise unavailable without notice.
Using vTuner to add Internet Radio stations to favorites

There are many Internet Radio stations in the world, and this unit can tune into these stations. But finding the radio station you want to hear may be difficult, because there are too many stations. If this is the case, then please use vTuner, an Internet Radio station search website specifically designed for this unit. You can use your PC to search Internet Radio stations and add them as your favorites. This unit can play radio stations added to vTuner.

1. Check the MAC address of this unit. “Network Information” (p. 81)
   - The MAC address is necessary when you create an account for vTuner.

2. Use your PC to access the vTuner website (http://www.radiodenon.com).

3. Enter the MAC address of this unit, then click “Go”.

4. Enter your E-mail address and a password of your choice.

5. Select the search criteria (genre, region, language, etc.) of your choice.
   - You can also enter a keyword to search for a station you want to hear.

6. Select the radio station of your choice from the list, and then click the Add to Favorites icon.

7. Enter the name of the favorite group, then click “Go”.
   A new favorite group that includes the selected radio station is created.
   - Internet Radio stations added to favorites in vTuner can be played from “radiodenon.com” with this unit (p. 33).

Files that can be played back

See “Playing back Internet Radio” (p. 107).
This unit can play back music files and playlists (m3u, wpl) stored on a PC and on Network Attached Storage (NAS) that supports DLNA.

The network audio playback function of this unit connects to the server using technologies shown below.

- Windows Media Player Network Sharing Service
- This unit can play back the following files.
  - WMA
  - MP3
  - WAV
  - MPEG-4 AAC
  - FLAC
  - ALAC
  - AIFF
  - DSD
Applying media sharing settings

Here, we apply the settings to share music files stored on a PC and NAS on the network. If you are using a Media Server, be sure to apply this setting first.

■ When using Windows Media Player 12 (Windows 7 / Windows 8)

1 Start up Windows Media Player 12 on the PC.
2 Select “More streaming options...” in the “Stream”.
3 Select “Allowed” in the drop-down list for “Denon DRA-100”.
4 Select “Allowed” in the drop-down list for “Media programs on this PC and remote connections...”.
5 Follow the instructions on the screen to complete the settings.

■ When using Windows Media Player 11

1 Start up Windows Media Player 11 on the PC.
2 Select “Media Sharing” in the “Library”.
3 Click the “Share my media” check box, select “Denon DRA-100”, and then click “Allow”.
4 As you did in step 3, select the icon of the device (other PCs and mobile devices) you want to use as a media controller, and then click “Allow”.
5 Click “OK” to finish.

■ Sharing media stored on a NAS device

Change settings on the Network Attached Storage (NAS) device to allow this unit and other devices (PCs and mobile devices) used as media controllers to access the NAS. For details, see the owner’s manual that came with the NAS.
Playing back files stored on a PC and NAS

Use this procedure to play music files or playlists.

1 Prepare for playback.
   ① Check the network environment, then turn on this unit’s power.
   “Connecting to a home network (LAN)” (p. 25)
   ② Prepare the computer (Computer’s operating instructions).

2 Press MUSIC SERVER.

3 Use △▽ to select the server including the file to be played, then press ENTER.

4 Use △▽ to select the file, then press ENTER.
Playback starts once buffering reaches “100%”.

Files that can be played back

See “Playing back files stored on PC or NAS” (p. 108).

- WMA Lossless files can be played when using a server supporting transcoding, such as Windows Media Player Ver. 11 or later.

**NOTE**

- When playing back music files with your PC or NAS connected through wireless LAN, audio may be interrupted depending on your wireless LAN environment. In this case, play back music files with your PC or NAS connected through wired LAN.
- The order in which the tracks/files are displayed depends on the server specifications. If the tracks/files are not displayed in alphabetical order due to the server specifications, searching by the first letter may not work properly.
This section provides information on the Favorite function.

- The Favorite function allows you to register your favorite radio stations and files in the Favorite List in advance so that you can call and listen to the stations or files right away, whenever you want.
- The contents that you can register and call are Internet radio station, music server, USB and iPod (only when using “On-Display” mode).
- Up to 50 items can be stored in the Favorite List.
Registering stations or files to the favorites list

1. Press FAVORITES ADD while the Internet radio station or file to register is played back.

2. Use Δ∨ to select a number to register the station or file, and press ENTER.
   “Added To Favorites” is displayed and the registration is competed.

Calling stations or files from the favorites list

1. Press FAVORITES CALL.

2. Use CH+, CH– or Δ∨ to select the station or file that you want to call, and press ENTER.
   The respective function starts up and playback starts.

   - Press 0 – 9, +10 to call files registered to the Favorite list by number.

To switch between registered stations and files during playback

1. Use CH+, CH– or Δ∨.

Deleting stations or files from the favorite list

1. Press FAVORITES CALL.

2. Use Δ∨ to select the station or file that you want to delete, and press CLEAR.

3. When the prompt “Delete?” appears, press ENTER.
   “Deleted” is displayed and the deletion is completed.

   - Press < to cancel the operation.
You can use the USB cable provided with the iPod to connect the iPod with the unit’s USB port and enjoy music stored on the iPod.

For information on the iPod models that can be played back with this unit, see “Supported iPod/iPhone models” (p. 24).
Listening to music on an iPod

1 Connect the iPod to the USB port. (☞ p. 23)
When you connect iPod to the USB port, the input source automatically switches to “iPod/USB”.

2 Press iPod/USB to switch the input source to “iPod/USB”.
“From iPod” is displayed on the display of this unit.

3 Operate iPod itself directly while seeing the iPod screen to play back music.

NOTE
- The iPod display modes include “From iPod” and “On-Display”. By default, “From iPod”, where you directly operate the iPod itself while looking at the iPod screen, is set.
- To change to “On-Display” where operations are performed while the iPod information is displayed on this unit, see “Setting operation mode (“On-Display” mode)” (☞ p. 44).
- You can also listen to iPod music using “AirPlay function” (☞ p. 56).

- Note that Denon will accept no responsibility whatsoever for any problems arising with the data on an iPod when using this unit in conjunction with the iPod.
Setting operation mode (“On-Display” mode)

In this mode, various lists and screens during playback on the iPod are displayed on the body.
This section describes the steps up to playing back tracks on the iPod in “On-Display”.

1. Press MODE and display “On-Display”.

2. Use ▲▼ to select the file to be played, then press ENTER.
Playback starts.

### NOTE

- Denon will accept no responsibility whatsoever for any loss of iPod data.
- Depending on the type of iPod and the software version, some functions may not operate.
Charging the iPod/iPhone

You can charge your iPod/iPhone by connecting it to USB port.

**Standby charging**

If the unit enters power standby mode while the iPod/iPhone is charging, the unit will switch to standby charging mode, and the iPod/iPhone will continue to be charged. When in standby charging mode, the power indicator lights turns red.

When the iPod/iPhone is fully charged, the unit automatically stops supplying power for charging and enters normal power standby mode, and the power indicator lights turns off.

- When the “Network Control” setting is “On”, the power indicator lights red when charging is complete. (→ p. 81)
Playing a USB memory device

- Playing back music files stored on a USB memory device.
- Only USB memory devices conforming to mass storage class and MTP (Media Transfer Protocol) standards can be played on this unit.
- This unit is compatible with USB memory devices in “FAT16” or “FAT32” format.
- This unit can play back the following files.
  - MP3
  - WMA
  - WAV
  - MPEG-4 AAC
  - FLAC
  - ALAC
  - AIF
  - DSD
Playing files stored on USB memory devices

1. Connect the USB memory device to the USB port. *(p. 23)*
   When you connect USB memory device to the USB port, the input source automatically switches to “iPod/USB”.

2. Press iPod/USB to switch the input source to “iPod/USB”.

3. Use △▽ to select the file to be played, then press ENTER.
   Playback starts.

To play another file while playing from a USB memory device, press ◀ to display the folder tree, ▲▼ to select the file to be played, and then press ENTER.

Note that Denon will accept no responsibility whatsoever for any problems arising with the data on a USB memory device when using this unit in conjunction with the USB memory device.

Files that can be played back

See “Playing back USB memory devices” (☞ p. 105).
Listening to music on a Bluetooth device

Music files stored on Bluetooth devices such as smartphones, digital music players, etc. can be enjoyed on this unit by pairing and connecting this unit with the Bluetooth device.

Communication is possible up to a range of about 10 m.

NOTE

- To play back music from a Bluetooth device, the Bluetooth device needs to support the A2DP profile.
Playing music from Bluetooth device

In order to enjoy music from a Bluetooth device on this unit, the Bluetooth device must first be paired with this unit. Once the Bluetooth device has been paired, it does not need to be paired again.

1. **Press Bluetooth to switch the input source to “Bluetooth”**.
   When using for the first time, the unit will go into the pairing mode automatically and “Pairing Mode” will appear on the display of the unit.

2. **Activate the Bluetooth settings on your mobile device.**

3. **Select this unit when its name appears in the list of devices displayed on the screen of the Bluetooth device.**
   Connect to the Bluetooth device while “Pairing Mode” is being displayed on the display of the unit.
   Perform the connection with the Bluetooth device close to the unit (about 1 m).

4. **When a number appears on the display of this unit, check that it is the same number as that shown on the screen of the Bluetooth device and then select “pair” for both the Bluetooth device and the unit.** (To select “pair” on this unit, press ENTER on the unit.)
   At the end of the pairing, the device name appears on the display of this unit.

5. **Play music using any app on your Bluetooth device.**
   - The Bluetooth device can also be operated with the remote control of this unit.
   - The next time the input source is switched to Bluetooth, this unit automatically connects to the last Bluetooth device that was connected.

- Enter “0000” when the password is requested on the screen of the Bluetooth device.
## Operation buttons

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>▶/■</td>
<td>Playback / Pause</td>
</tr>
<tr>
<td></td>
<td>(Press and Hold) Stop</td>
</tr>
<tr>
<td>◀▶▶▶</td>
<td>Skip to previous track / Skip to next track</td>
</tr>
<tr>
<td></td>
<td>(Press and hold) Fast-reverse / Fast-forward</td>
</tr>
</tbody>
</table>

- Press INFO on the remote control unit during playback to switch the display between Artist name, Album name, etc.
- Incompatible characters are displayed as “.” (period).

### NOTE
- To operate the Bluetooth device with the remote control of this unit, the Bluetooth device needs to support the AVRCP profile.
- The remote control of this unit is not guaranteed to work with all Bluetooth devices.
- Depending on the type of Bluetooth device, this unit outputs audio that is coupled to the volume setting on the Bluetooth device.
Pairing with other Bluetooth devices

Pair a Bluetooth device with this unit.

1. **Activate the Bluetooth settings on your mobile device.**

2. **Press SEARCH when the input source is “Bluetooth”**.
   The device will go into the pairing mode.

3. **Select this unit when its name appears in the list of devices displayed on the screen of the Bluetooth device.**

4. **When a number appears on the display of this unit, check that it is the same number as that shown on the screen of the Bluetooth device and then select “pair” for both the Bluetooth device and the unit.** (To select “pair” on this unit, press ENTER on the unit.)
   At the end of the pairing, the device name appears on the display of this unit.

- This unit can be paired with a maximum of 8 Bluetooth devices. When a 9th Bluetooth device is paired, it will be registered in place of the oldest registered device.
- Enter “0000” when the password is requested on the screen of the Bluetooth device.
- Either press and hold Bluetooth for 3 seconds, or switch the input source to “Bluetooth” and then press and hold INPUT on this unit for more than 3 seconds to switch to pairing mode.
Reconnecting to this unit from a Bluetooth device

After pairing is completed, the Bluetooth device can be connected without performing any operations on this unit. This operation also needs to be performed when switching the Bluetooth device for playback.

1. If a Bluetooth device is currently connected, deactivate the Bluetooth setting of that device to disconnect it.

2. Activate the Bluetooth setting of the Bluetooth device to be connected.

3. Select this unit from the Bluetooth device list on your Bluetooth device.

4. Play music using any app on your Bluetooth device.

Tips
- When the power of this unit is turned on, the input source will be automatically switched to “Bluetooth” if a Bluetooth device is connected.
- When the “Network Control” setting of this unit is set to “On” and a Bluetooth device is connected with the unit in the standby state, the power of the unit will be turned on automatically.
Connecting a Bluetooth device with the NFC function via NFC

You can just touch this unit with a Bluetooth device to turn on power to this unit and perform pairing or establish a connection between this unit and the Bluetooth device.

1 Turn on the NFC function on the Bluetooth device.
   • For details, see the owner’s manual for your Bluetooth device.

2 Touch N on this unit with the NFC antenna part on the Bluetooth device.
   If a pairing confirmation screen is displayed, follow the instructions on this unit and the Bluetooth device to complete pairing.
   • Complete operations as instructed by the Bluetooth device.

3 Play back music on the Bluetooth device.
   This unit outputs music from the Bluetooth device.
   • When “Network Control” is set to “On”, startup and connection can be performed even when the unit power is off.
   • When you touch the N mark (N) on this unit with the Bluetooth device that is playing back music, this unit outputs that music.
   • Touch the N mark (N) again during the Bluetooth connection to disconnect the connection.
   • Touch the N mark (N) again if pairing or connection with the Bluetooth device fails.

NOTE
   • Before establishing a NFC connection, cancel the lock function on the Bluetooth device.
   • When you touch this unit with a Bluetooth device, do so softly.
Listening to DIGITAL IN

1 Prepare for playback.
   Check the connection, then turn on this units.

2 Press OPTICAL or COAXIAL to select “Optical 1”, “Optical 2” or “Coaxial”.

3 Play the component connected to this unit.

* Only 2-channel linear PCM digital audio signals can be inputted through the DIGITAL IN connector of this unit.

Listening to ANALOG IN

1 Prepare for playback.
   Check the connection, then turn on this units.

2 Press ANALOG to select “Analog 1” or “Analog 2”.

3 Play the component connected to this unit.
AirPlay function

Music files stored on your iPhone, iPod touch, iPad or iTunes can be played on this unit via the network.

- You can stop AirPlay playback by pressing ◀ or choosing other input source.
- To see song and artist names together, press INFO on the remote control unit.
- For information about how to use iTunes, also see the Help for iTunes.
- The screen may differ depending on the OS and software versions.
Playing songs from your iPhone, iPod touch or iPad

If you update your “iPhone/iPod touch/iPad” to iOS 4.2.1 or later, you can stream music stored in your “iPhone/iPod touch/iPad” directly to this unit.

1. Connect your iPhone, iPod touch or iPad Wi-Fi to the same network as this unit.
   - For details, see your device's manual.

2. Play the song on your iPhone, iPod touch or iPad.
   - is displayed on the iPhone, iPod touch or iPad screen.

3. Tap the AirPlay icon .

4. Select this unit.

Playing iTunes music with this unit

1. Install iTunes 10, or later, on a Mac or Windows PC that is connected to the same network as this unit.

2. Turn this unit ON.
   - Set “Network Control” to “On” for this unit. (p. 81)
   - When “Network Control” is set to “On”, the unit consumes more standby power.

3. Start iTunes and click the AirPlay icon to select the main unit.

4. Choose a song and click play in iTunes.
   - The music will stream to this unit.
Selecting multiple speakers (devices)

It is possible to play iTunes songs on your home’s AirPlay compatible speakers (devices) other than those of this unit.

1. Click the AirPlay icon and select “Multiple”.

2. Check the speakers you want to use.

**NOTE**

- In playback using the AirPlay function, the sound is output at the iPhone, iPod touch, iPad or iTunes volume setting level. You should turn down the iPhone, iPod touch, iPad or iTunes volume prior to playback and then adjust it to a suitable level.
Spotify Connect function

Spotify is the world’s most popular streaming service. If you subscribe to Spotify Premium, you can control your new speaker with your phone or tablet. Because Spotify is built-in to your speaker, you can still take calls or use other apps - the music never stops.
For information on how to set up and use Spotify Connect please visit www.spotify.com/connect.

Playing Spotify music with this unit

Download the “Spotify App” onto your Android or iOS device beforehand. To play a Spotify track in this unit, you need to register in the Spotify premium account first.

1. Connect the Wi-Fi settings of the iOS or Android device in the same network as this unit.
2. Launch the Spotify App.
3. Play back the Spotify track.
4. Tap the 🅰️ icon to select the unit.
   The music will stream to this unit.
Remote play function

You can use your home network to play back with this unit music files stored on PC, NAS, smartphones and portable audio players. In this case, you use PC, smartphones and portable audio players for operations.

- The relevant devices should comply with the DLNA (Digital Living Network Alliance) Ver. 1.5 standard.
- A wireless LAN environment is required for playing back music files on smartphones or portable audio players.
- For some smartphones, you must install an application for DLNA music playback.

Roles each device plays

The following devices are used for Remote Play. As specified in the DLNA standard, these devices are called DMC, DMS or DMR according to their role.

<table>
<thead>
<tr>
<th>Name</th>
<th>Device example</th>
<th>Role</th>
</tr>
</thead>
</table>
| DMC (Digital Media Controller) | • PC  
• Smartphone  
• Portable audio player  
• Denon Hi-Fi Remote App | Performs Remote Play operations. DMC can also play back music files stored on these devices. |
| DMS (Digital Media Server)   | • PC  
• NAS (Network Attached Storage) | Stores music files. Music files stored on these devices are played back with DMC. |
| DMR (Digital Media Renderer) | • This unit | Outputs audio of music files played back through Remote Play from speakers. DMR cannot perform playback operations. |

Files that can be played back

See “Playing back files stored on PC or NAS” (p. 108).
Settings required for each device

You must make settings on DMC and DMS for Remote Play. Make the following settings. Also see the owner’s manual of each device for settings.

Settings on computer and NAS

Make settings on computer and NAS to exchange data with DMR devices.
For details on the settings, see “Applying media sharing settings” (p. 37).

Settings on smartphones

You must install an application for DLNA music playback on your smartphone to perform operations on DMS and this unit (DMR) with your smartphone. The applicable application differs according to your smartphone.

- Some smartphones support DLNA music playback with the factory settings. See the owner’s manual of your smartphone.

Settings on portable audio players

Configure the settings so that this unit (DMR) can play back music files stored on your portable audio player. For details on the settings, see the owner’s manual of your portable player.

Settings on this unit

Connect this unit to the DLNA network. You do not need to make other settings.
For the network connection, see the provided “Quick Setup Guide”, “Connecting to a home network (LAN)” (p. 25) and “Settings” (p. 83).
Remote Play operations
Operations are different for each device, but the procedures for preparing for Remote Play are the same. The preparation procedures are shown below.

1 Turn on this unit.
   • Make sure that this unit is connected to the network.

2 Display the music file playback screen on DMC.
   • For PC, open Windows Media Player 12, etc.
   • For smartphones, switch to the music file playback mode.

3 Select the friendly name of this unit for the item that sets the playback device on the playback screen.
   • The default Friendly Name of this unit is “Denon DRA-100”.

4 Start playing back a music file on DMC.
   • The function on this unit automatically switches to “Music Server” and the Remote Play mark appears on the display. Remote Play starts.

NOTE
• Press < to exit Remote Play mode.

• During Remote Play, you cannot perform playback operations with this unit. Use the DMC device for these operations.
Web control function

You can control this unit from a web control screen on a web browser.

Controlling the unit from a web control

1. Switch the “Network Control” setting to “On”. (p. 81)

2. Check the IP address of this unit with “Network Information”. (p. 81)

3. Start up the web browser.

- This unit and the PC or tablet need to be connected to the network properly in order to use the web control function. “Connecting to a home network (LAN)” (p. 25)
- Depending on the settings of your security-related software, you may not be able to access this unit from your PC. If this is the case, then change the settings of the security-related software.
4 Enter the IP address of this unit in browser’s address box.
   For example, if the IP address of this unit is “192.168.0.2”, enter “http://192.168.0.2”.

5 When the top menu is displayed, click on the menu item you want to operate.

   ① Entering the IP address.
   ② If you are using the Safari web browser, you can select “Bonjour” and directly access the unit’s web control screen from the overview section.

   • By adding this unit’s IP address to the browser’s bookmark, you can display the web control screen using the bookmark function the next time you use the browser. If you are using a DHCP server and “Network Control” is set to “Off”, turning the power on/off changes the IP address (☞ p. 81).
6 Operate.

[Example 1] Network Setting 1

- **Friendly Name setting**
  1. To change the Friendly Name, enter the new name in the text box and click “Set”.
  2. To reset the Friendly Name, click “Set Default”.

- **Network connection settings**
  1. Click to change the network connection method. If you select “Wi-Fi”, a new item will appear on-screen. (Example 2)
  2. Click to change DHCP/proxy settings. (Example 2)
  3. Click to connect using the newly applied settings.

- Only characters that can be displayed on this unit can be set. (p. 74)
7 Operate.

[Example 2] Network Setting 2

Network connection settings

9 [Example 2] - Displayed when “Wi-Fi” is selected in 8. Select or input items as necessary, and then click “Test Connection” to apply the changes.

- Items displayed may vary depending on selected items and connection status.
- After selecting each item, wait a moment for the display to be updated.

10 [Example 2] - Displayed when “DHCP” or “Proxy” is selected in 7. When changing DHCP/proxy settings, input or select for each item.

- To apply network connection settings, click “Test Connection” after making changes.
Convenience functions

Adjusting the tone 68
Sleep timer function 69
Switching the display's brightness 69
Adjusting the tone

1. Press TONE to select the tone parameter to be adjusted.

2. Use △▽ to adjust the “Source Direct”, “Bass”, “Treble” or “Balance”.

- **Source Direct**
  The “Bass”, “Treble” and “Balance” are not adjusted.

- **Bass**
  Adjusts the bass sound.

- **Treble**
  Adjusts the treble sound.

- **Balance**
  Use <□> to adjust the left/right volume balance.
Sleep timer function

You can have the power automatically switched to standby once a set time has elapsed. This is convenient for listening while going to sleep.

1. Press SLEEP during playback and select the setting time.
   - The S indicator on the display lights.
   - You can set the sleep timer in the range from 10 to 90 minutes in steps of 10 minutes.

To cancel the sleep timer

Press SLEEP to set “Sleep ➤Off”.
   - The S indicator on the display turns off.

- The sleep timer setting is canceled when the unit switches to standby mode.
- To check the time remaining until the sleep timer is activated, press SLEEP.

Switching the display’s brightness

1. Press DIMMER.
   - The brightness of the display switches each time the button is pressed (3 levels).
Menu map

For menu operations, see the following page.
By default, this unit has recommended settings defined. You can customize this unit based on your existing system and your preferences.

* Displayed when the “DHCP” setting is “Off”. (☞ p. 83)
Menu operation

1 Press SETUP.
   The menu is displayed.

2 Use △▼ to select the menu to be set or operated, then press ENTER.

3 Use △▼ to change to desired setting.

4 Press ENTER to enter the setting.
   • To return to the previous item, press ◀.
   • Exiting the Menu, press SETUP while the menu is displayed. The menu display disappears.
   • To back to the top of the menu, during menu operation, press TOP MENU.
Inputting characters

On this unit, you can change the name displayed on the following screens to the names that you prefer.

- Friendly Name (☞ p. 82)
- Character input for the network functions (☞ p. 33)

Using the number buttons

1. Display the screen for inputting characters.
   - To change a character, use ◀ to align the cursor with the character that you want to change.

2. Press +10 to select the character type (upper case, lower case, or numeric characters).

3. Press 0 – 9, +10 until the desired character is displayed.
   - The types of characters that can be input are as shown below.

   | 1. | 1. @ - _/ : | 6. | m n o M N O 6 |
   | 2. | a b c A B C 2 | 7. | p q r s P Q R S 7 |
   | 3. | d e f D E F 3 | 8. | t u v T U V 8 |
   | 4. | g h i G H I 4 | 9. | w x y z W X Y Z 9 |
   | 5. | j k I J K L 5 | 0. | % & ‘ ( ) * + , < = > ? [ \ ] ^ ` { | |

4. Repeat steps 2 and 3 to change the name then press ENTER to register it.
Using the cursor buttons

1. Display the screen for inputting characters.
   - To change a character, use ← to align the cursor with the character that you want to change.

2. Use △▽ to change the character.
   - The types of characters that can be input are as shown below.

   ![Character List]

   - [Lower case] abcdefghijklmnopqrstuvwxyz
   - [Upper case] ABCDEFGHIJKLMNOPQRSTUVWXYZ
   - [Symbols] !"#$%&'()*+,-./:;<=>?@[\]^_`{|}~
   - [Numbers] 0123456789

3. Repeat step 2 to change the name then press ENTER to register it.

   ![Note]

   - Press CLEAR to delete the character.
   - Press ► to insert a space.
General

Make various other settings.

**Volume Limit**

- **Make a setting for maximum volume**

Limits the volume to ensure safe use of this product, and also makes it easier to adjust the volume from AirPlay or an app to an ideal range.

-30dB / -15dB / 0dB (Full throttle) / Other (Default : -30dB)

When “Other” is selected, the volume upper limit can be set within the range of -60dB - 0dB. Select the value using ▲▼ and then press ENTER to enter the setting value.

- When the maximum volume is set, if you increase the volume to the setting value and press VOLUME ▲ again, “Allow max volume?” is displayed. If you press ENTER the maximum volume limit is canceled.

**H/P Amplifier Gain**

Set the gain of the headphone amplifier. Set this according to the impedance of the connected headphones. It is recommended that this is set on the “Low” side if the headphones have low impedance and on the “High” side if they have high impedance.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low</td>
<td>Set the gain of the headphone amplifier to “Low”.</td>
</tr>
<tr>
<td>Mid</td>
<td>Set the gain of the headphone amplifier to “Mid”.</td>
</tr>
<tr>
<td>High</td>
<td>Set the gain of the headphone amplifier to “High”.</td>
</tr>
</tbody>
</table>

**NOTE**

- The headphone volume varies depending on the “H/P Amplifier Gain” setting. Decrease the volume or mute the audio first if changing this setting while listening to audio.
## Audio Out

You can set whether to “Fixed” or “Variable” the analog audio output level.

<table>
<thead>
<tr>
<th>Fixed</th>
<th>Fix the analog audio output level.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Variable</td>
<td>You can adjust the analog audio output level using the VOLUME buttons on the remote control. The analog audio output volume is linked to the Speaker volume.</td>
</tr>
</tbody>
</table>

### NOTE

- Note that the analog audio output level changes to the maximum when the analog audio output setting is changed from “Variable” to “Fixed”.
- Before changing the settings, turn the volume of the amp connected to the AUDIO OUT connectors to the minimum volume.

## Language

Set the language for display on the menu.

**English / Deutsch / Français / Italiano / Nederlands / Español / Svenska / Русский / Polski** (Default : English)

## Auto-Standby

When “Auto-Standby” is set to “On”, and no operations are made in the stopped state for the set amount of time, this unit automatically enters standby mode.

For the input source “Tuner” and “From iPod” only, when no operation is performed for eight hours, this unit automatically enters the standby mode.

1min / 5min / 15min / Other  
( Default : 15min ): When “Other” is selected, the “Auto-Standby” time can be set within the range of 1 - 99 minutes. Select the value using and then press ENTER to enter the setting value.

Off: The unit does not go into standby automatically.
Usage Data

For product improvement purposes, please send information on the device settings and operating conditions of the functions to Denon. Information provided by customers will be used as reference material for product development purposes in the future. Denon will never provide any information we collect to third parties.

<table>
<thead>
<tr>
<th>Yes:</th>
<th>Provide information on the operating status of this unit.</th>
</tr>
</thead>
<tbody>
<tr>
<td>No:</td>
<td>Do not provide information on the operating status of this unit.</td>
</tr>
</tbody>
</table>

Firmware

Set whether or not to check for firmware update, update the firmware, and display update, upgrade and alert notifications.

### Update

Update the firmware of this unit.

<table>
<thead>
<tr>
<th>Check For Update:</th>
<th>Check for firmware updates.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Update Start:</td>
<td>Execute the update process.</td>
</tr>
</tbody>
</table>

- Even if the update fails, this unit will automatically try to update again.
Notifications

Notification messages are displayed in the screen when the power is switched on when new firmware can be used, or when there are other notification messages.

Update

On (Default): Display update message.

Off: Do not display update message.

Upgrade

On (Default): Display upgrade message.

Off: Do not display upgrade message.

Notification Alerts

On (Default): Displays notification messages from Denon in the popup menu.

Off: Does not display notification messages from Denon in the popup menu.

Add New Feature

Display new features that can be downloaded to this unit and perform an upgrade.

Upgrade package: Display the items to be upgraded.

Upgrade Status: Display a list of the additional functions provided by the upgrade.

Upgrade Start: Execute the upgrade process. When the upgrade starts, the menu screen is shut down. During the upgrade, the amount of upgrade time which has elapsed is displayed.

Upgrade ID: The ID number shown on the display is needed when carrying out the procedure.

See the Denon website for details about upgrades.

When the procedure is complete, “Registered” is displayed in this menu and upgrades can be carried out. If the procedure has not been carried out, “Not Registered” is displayed.
Notes concerning use of “Update” and “Add New Feature”

- In order to add new functions, the environment and settings required for connecting to broadband internet are needed. ([p. 25])
- Perform the add new feature operation after at least 2 minutes has elapsed since turning this unit’s power on.
- Do not turn off the power until updating or upgrading is completed.
- Even with a broadband connection to the Internet, approximately 20 minutes is required for the updating/upgrading procedure to be completed.
- Once updating/upgrade starts, normal operations on this unit cannot be performed until updating/upgrading is completed. Furthermore, updating/upgrading the firmware may reset the backup data for the parameters, etc. set for this unit.
- When the update or upgrade failed with a message such as “Update failed” and “Download failed”, remove and re-insert the power cord. “Update Retry” appears on the display and update restarts from the point at which update failed. If the error continues despite this, check the network environment.

NOTE
- It takes approximately 90 seconds for all of the settings to be returned to the default settings. When turning the power off, do not remove the power plug for approximately 90 seconds after “Initialized” is displayed.

Reset

Perform this procedure if the display is abnormal or if operations cannot be performed. Various settings are reset to the factory default values. Make settings again.

Cancel: Values are not reset.

Reset factory defaults: Values are reset.

Information regarding the “Update” function and “Add New Feature” will be announced on the Denon web site each time related plans are defined.
Network

To use this unit by connecting it to a home network (LAN), you must configure network settings. If you set up your home network via DHCP, set “DHCP” to On (use the default setting). This allows this unit to use your home network.

If you assign an IP address for each device, you must use the “IP Address” setting to assign an IP address to this unit and enter the information about your home network such as the gateway address and subnet mask.

Network Information

Display network information.

**Friendly Name / DHCP On or Off / IP Address / MAC Address / SSID**

* This is displayed only while a Wi-Fi connection is enabled.

Network Control

Enables network communication in standby power mode.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>On:</strong></td>
<td>The network function can be used when in standby power mode. Main unit operable with a network compatible controller.</td>
</tr>
<tr>
<td><strong>Off</strong> (Default):</td>
<td>The network function cannot be used in standby power mode.</td>
</tr>
</tbody>
</table>

- When using the Web control function or a network controller or when you want to use Bluetooth/NFC quickly when the power is off, set “Network Control” to “On”.

**NOTE**

- When “Network Control” is set to “On”, the unit consumes more standby power.
### Friendly Name

The Friendly Name is the name of this unit displayed on the network. You can change the Friendly Name according to your preferences.

**Select Name**

Selects Friendly Name from the list.

Current Friendly Name / AV Room / Bedroom / Dining Room / Family Room / Guest Room / Kids Room / Kitchen / Living Room / Office / Denon DRA-100 / Other (Default : Denon DRA-100)

- When you select “Other”, you can change the Friendly Name according to your preferences.

- Up to 63 characters can be input.
- For character input, see (p. 74).

### Wi-Fi

You can stop the Wi-Fi function when connecting this unit to the network using Wired LAN.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Enabled</strong></td>
<td>The Wi-Fi function is used.</td>
</tr>
<tr>
<td><strong>Disabled</strong></td>
<td>The Wi-Fi function is stopped.</td>
</tr>
</tbody>
</table>

### Bluetooth

You can stop the Bluetooth function.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Enabled</strong></td>
<td>The Bluetooth function is used.</td>
</tr>
<tr>
<td><strong>Disabled</strong></td>
<td>The Bluetooth function is stopped.</td>
</tr>
</tbody>
</table>
Settings

You can make detailed settings for the network.
To change the network environment, perform “Quick Setup”. (For details on the operations, see the separate “Quick Setup Guide”.)

- If you are using a broadband router (DHCP function), there is no need to make the settings at “IP Address” and “Proxy”, since the DHCP function is set to “On” in this unit’s default settings.
- Only set “Settings” when connecting to a network without a DHCP function.

## Wired Setup

### DHCP

Selects how to connect to the network.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On (Default)</td>
<td>Configure the network settings automatically from your router.</td>
</tr>
<tr>
<td>Off</td>
<td>Configure the network settings manually.</td>
</tr>
</tbody>
</table>

### IP Address

Set the IP address within the ranges shown below.

- The Network Audio function cannot be used if other IP addresses are set.
  - CLASS A: 10.0.0.1 - 10.255.255.254
  - CLASS B: 172.16.0.1 - 172.31.255.254
  - CLASS C: 192.168.0.1 - 192.168.255.254

### Subnet Mask

When connecting an xDSL modem or connector adapter directly to this unit, input the subnet mask indicated in the documentation supplied by your provider. Normally input 255.255.255.0.

### Gateway

When connected to a gateway (router), input its IP address.

### Primary DNS, Secondary DNS

If there is only one DNS address indicated in the documentation supplied by your provider, enter it for “Primary DNS”. If two or more DNS are provided by your provider, enter one for “Secondary DNS”.

Proxy

Make this setting when connecting to the Internet via a proxy server. Make the proxy settings only when you connect to the Internet via a proxy server that is on your internal network or provided by your provider, etc.

Proxy (Off) or Proxy (On): Set the proxy server.

Proxy (Address) or Proxy (Name): Select when inputting by address or domain name.

Address or Name: Inputting address or domain name. Up to 38 characters can be input.

Port: Enter port number.

If you cannot connect to the Internet, recheck the connections and settings. (p. 25)

If you do not understand about Internet connection, contact your ISP (Internet Service Provider) or the store from which you purchased your computer.

Wi-Fi Setup Method

In this menu, Wi-Fi settings and connections can be made using any of the five connection methods.

Auto-Scan / Share Wi-Fi setting from an iOS device / WPS (Wi-Fi Protected Setup) / Web Browser Setup / Manual

- If a LAN cable is connected, remove it.
- See the “Quick Setup Guide” for details on how to connect to Wi-Fi using the Wi-Fi connect button on the rear panel.
Auto-Scan

This automatically searches for networks.

1 From the list of the networks, select the one you want to connect to.
   - Select "Rescan" if the network cannot be found.

2 Make the following settings.

   - Default Key: Select the default key.
     - When connecting to a WEP encrypted network, “Default Key” menu is displayed.
   - Password: Input the password.
   - DHCP/Proxy: Performs the DHCP and proxy setting.
     (“DHCP” (p. 83), “Proxy” (p. 84))
   - Test Connection: Test the connection.

Share Wi-Fi setting from an iOS device

You can use an iOS device such as an iPhone or iPad to configure Wi-Fi settings.

After selecting this item, select Settings/Wi-Fi from the iOS device home screen, select “Denon DRA-100” displayed at the bottom of the screen, and then follow the setting instructions displayed on the iOS device.

For details, see the “Quick Setup Guide”.

- The iOS version must be 7 or later.

WPS (Wi-Fi Protected Setup)

1 Register the PIN code of the unit in the router.
Web Browser Setup

Use a web browser to set up Wi-Fi.
A Wi-Fi device that can perform web browse operations is required.

1. Read the precautions on the screen, and press ENTER.

2. Select “Denon DRA-100” from the Wi-Fi network list of the Wi-Fi device.
   The IP address (192.168.1.16) appears on the unit.

3. Enter the IP address of this unit in browser’s address box.

   ![Image of entering IP address](image)

   ① Entering the IP address (192.168.1.16).
   ② If you are using the Safari web browser, you can select “Bonjour” and directly access the unit’s web control screen from the overview section.

4. When the top menu is displayed, click “NETWORK”.

   ![Image of navigating menu](image)

   ③ Click “NETWORK”. ([Example 1])
5 Operate.

[Example 1] Network Setting 1

Network connection settings

④ Click to change the network connection method. If you select “Wi-Fi”, a new item will appear on-screen. (Example 2)

[Example 2] Network Setting 2

Network connection settings

⑤ [Example 2] - Displayed when “Wi-Fi” is selected in ④. Select or input items as necessary, and then click “Test Connection” to apply the changes.
- Items displayed may vary depending on selected items and connection status.
- After selecting each item, wait a moment for the display to be updated.

To apply network connection settings, click “Test Connection” after making changes.
## Manual

Sets the wireless connection manually

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SSID</strong></td>
<td>Input the name of the wireless network (SSID).</td>
</tr>
<tr>
<td><strong>Security</strong></td>
<td>Select the encryption method according to the encryption setting of the access point you are using.</td>
</tr>
</tbody>
</table>
| **Default Key** | Select the Default Key.  
  - When connecting to a “WEP” encrypted network, “Default Key” menu is displayed. |
| **Password**| Input the password.                                                         |
| **DHCP/Proxy** | Performs the DHCP and proxy setting.  
  (“DHCP” (p. 83), “Proxy” (p. 84)) |
| **Test Connection** | Test the connection. |

<tr>
<td>Does not operate correctly even when reset</td>
<td>104</td>
</tr>
</tbody>
</table>
Tips

Simple operations in the power off state
• When the “Network Control” is set to “On”, you can perform playback, or other operations through AirPlay, “Denon Hi-Fi Remote”. (p. 81)

Simple operations for iPod/USB
• When connected to the USB port, the Input Source automatically changes and playback begins. (“Listening to music on an iPod” (p. 43), “Playing files stored on USB memory devices” (p. 47))

I only want to recharge my iPod
• Connect the iPod to this unit when the unit power is on. Then turn the unit power off, and the iPod will continue to charge until fully charged. (p. 45)

Changing or resetting the network environment
• Prepare the provided “Quick Setup Guide”, and run Setup – “Quick Setup”. For detailed settings, run Setup - “Network” - Settings. (p. 83)

Volume adjustment is difficult when using AirPlay or app operation, and the sound suddenly becomes too loud
• Reducing the “Volume Limit” setting value (to around -50dB to -30dB) limits the volume setting from AirPlay or an app to an ideal range and makes it easier to adjust the volume. (p. 76)
Troubleshooting

1. Are the connections correct?
2. Is the set being operated as described in the owner’s manual?
3. Are the other devices operating properly?

If this unit does not operate properly, check the items listed in the table below.
Should the problem persist, there may be a malfunction. In this case, disconnect the power immediately and contact your store of purchase.

### Power does not turn on / Power is turned off

<table>
<thead>
<tr>

</tbody>
</table>
*1 Only files that are not protected by copyright can be played on this unit. Content downloaded from pay sites on the Internet are copyright protected. Also, files encoded in WMA format when ripped from a CD, etc. on a computer may be copyright protected, depending on the computer’s settings.

*2 Copyright [2012] [D&M Holdings. Inc.] Licensed under the Apache License, Version 2.0 (the "License"); you may not use this file except in compliance with the License. You may obtain a copy of the License at http://www.apache.org/licenses/LICENSE-2.0

### Maximum Number of Playable Files and Folder

The limits on the number of folders and files that can be displayed by this unit are as follows.

<table>
<thead>
<tr>
<th>Item</th>
<th>Media</th>
<th>USB memory device</th>
</tr>
</thead>
<tbody>
<tr>
<td>Memory capacity</td>
<td></td>
<td>FAT16 : 2 GB, FAT32 : 2 TB</td>
</tr>
<tr>
<td>Number of folder directory levels</td>
<td>*1</td>
<td>8 levels</td>
</tr>
<tr>
<td>Number of folders</td>
<td></td>
<td>500</td>
</tr>
<tr>
<td>Number of files*2</td>
<td></td>
<td>5000</td>
</tr>
</tbody>
</table>

*1 The limited number includes the root folder.

*2 The allowable number of files may differ according to the USB memory device capacity and the file size.
Playing back Internet Radio

Playing back Bluetooth devices

This unit supports the following Bluetooth profiles.

- **A2DP (Advanced Audio Distribution Profile)**:
  When a Bluetooth device that supports this specification is connected, you can perform high quality streaming distribution of monaural and stereo audio data.

- **AVRCP (Audio/Video Remote Control Profile)**:
  When a Bluetooth device that supports this specification is connected, you can operate the Bluetooth device from this unit.

### Bluetooth communications

The radio waves broadcast from this unit may interfere with operations on medical equipment. The radio wave interference may cause a malfunction. Therefore, make sure to turn off power to this unit and Bluetooth devices in the following places.

- Hospitals, trains, airplanes, gas stands, and other places where flammable gas may occur.
- Places near automatic doors and fire alarms.

Playing back files stored on PC or NAS

- This unit is compatible with MP3 ID3-Tag (Ver. 2) standard.
- This unit is compatible with WMA META tags.
- If the image size of an album artwork exceeds 600 kB, then music may not be played back properly.
- A server or server software compatible with distribution in the corresponding formats is required to play music files via a network.

- Particularly when you play back large music files, depending on your wireless LAN environment, the playback sound may be interrupted. In this case, make the wired LAN connection.

## Last function memory

This stores the settings as they were immediately before going into the standby mode. When the power is turned back on, the settings are restored to as they were immediately before going into the standby mode.
Explanation of terms

Audio

ALAC (Apple Lossless Audio Codec)
This is a codec for lossless audio compression method developed by Apple Inc. This codec can be played back on iTunes, iPod or iPhone. Data compressed to approximately 60 – 70% can be decompressed to exactly the same original data.

AIFF (Audio Interchange File Format)
This is an uncompressed and lossless format for digital audio. Use AIFF files to burn high-quality audio CDs from imported songs. AIFF files use approximately 10 MB of disk space per minute.

DSD (Direct-Stream Digital)
One of the audio data recording methods, it is the signal aspect used to store audio signals on a super audio CD, and is Δ-Σ modulated digital audio. It is configured of an array of single bit values at a 2.8 MHz sampling rate.

FLAC
FLAC stands for Free lossless Audio Codec, and is a lossless free audio file format. Lossless means that the audio is compressed without any loss in quality.
The FLAC license is as shown below.
Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:
- Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
- Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
- Neither the name of the Xiph.org Foundation nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.
THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS “AS IS” AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE FOUNDATION OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

MP3 (MPEG Audio Layer-3)
This is an internationally standardized audio data compression scheme, using the “MPEG-1” video compression standard. It compresses the data volume to about one eleventh its original size while maintaining sound quality equivalent to a music CD.

MPEG (Moving Picture Experts Group), MPEG-2, MPEG-4
These are the names for digital compression format standards used for the encoding of video and audio. Video standards include “MPEG-1 Video”, “MPEG-2 Video”, “MPEG-4 Visual”, “MPEG-4 AVC”. Audio standards include “MPEG-1 Audio”, “MPEG-2 Audio”, “MPEG-4 AAC”.

WMA (Windows Media Audio)
This is audio compression technology developed by Microsoft Corporation.
WMA data can be encoded using Windows Media® Player. To encode WMA files, only use applications authorized by Microsoft Corporation. If you use an unauthorized application, the file may not work properly.
**Sampling frequency**
Sampling involves taking a reading of a sound wave (analog signal) at regular intervals and expressing the height of the wave at each reading in digitized format (producing a digital signal).
The number of readings taken in one second is called the “sampling frequency”. The larger the value, the closer the reproduced sound is to the original.

**Speaker impedance**
This is an AC resistance value, indicated in Ω (ohms). Greater power can be obtained when this value is smaller.

**Bit rate**
This expresses the read amount per 1 second of video/audio data recorded. A larger number means higher sound quality, but also means a larger file size.

### Network

**AirPlay**
AirPlay sends (plays) contents recorded in iTunes or on an iPhone/iPod touch/iPad to a compatible device via the network.

**DLNA**
DLNA and DLNA CERTIFIED are trademarks and/or service marks of Digital Living Network Alliance. Some contents may not be compatible with other DLNA CERTIFIED® products.
vTuner
This is a free online content server for Internet Radio. For inquiries about this service, visit the vTuner site below.

vTuner website:
http://www.radiodenon.com
This product is protected by certain intellectual property rights of Nothing Else Matters Software and BridgeCo. Use or distribution of such technology outside of this product is prohibited without a license from Nothing Else Matters Software and BridgeCo or an authorized subsidiary.

WEP Key (network key)
This is key information used for encrypting data when conducting data transfer. On this unit, the same WEP key is used for data encryption and decryption, so the same WEP key must be set on both devices in order for communications to be established between them.

Wi-Fi®
Wi-Fi Certification assures tested and proven interoperability by the Wi-Fi Alliance, a group certifying interoperability among wireless LAN devices.

WPA (Wi-Fi Protected Access)
This is a security standard established by the Wi-Fi Alliance. In addition to the conventional SSID (network name) and WEP key (network key), it also uses a user identification function and encrypting protocol for stronger security.

WPA2 (Wi-Fi Protected Access 2)
This is a new version of the WPA established by the Wi-Fi Alliance, compatible with more secure AES encryption.

WPA-PSK/WPA2-PSK (Pre-shared Key)
This is a simple authentication system for mutual authentication when a preset character string matches on the wireless LAN access point and client.

WPS (Wi-Fi Protected Setup)
This is a standard drawn up by the Wi-Fi Alliance to ease the task of setting up wireless LAN connections and configuring security.

Network Names (SSID: Service Set Identifier)
When forming wireless LAN networks, groups are formed to prevent interference, data theft, etc. These groups are based on “SSID (network names)”. For enhanced security, a WEP key is set so that communication is unavailable unless both the “SSID” and the WEP key match. This is suitable for constructing a simplified network.
### Others

**Pairing**
Pairing (registration) is an operation that is required in order to connect a Bluetooth device to this unit using Bluetooth. When paired, the devices authenticate each other and can connect without mistaken connections occurring.
When using Bluetooth connection for the first time, you need to pair this unit and the Bluetooth device to be connected.

**Protection circuit**
This is a function to prevent damage to devices within the power supply when an abnormality such as an overload, excess voltage occurs or over temperature for any reason.

*2 The actual communication range varies depending on the influence of such factors as obstructions between devices, electromagnetic waves from microwave ovens, static electricity, cordless phones, reception sensitivity, antenna performance, operating system, application software etc.
General

Power supply: AC 220 - 230 V, 50/60 Hz
Power consumption: 60 W
Power consumption in standby mode: 0.3 W
Power consumption in “Network Control” – “On” mode: 3 W

- For purposes of improvement, specifications and design are subject to change without notice.

Boost Software License – Version 1.0 – August 17th, 2003

Permission is hereby granted, free of charge, to any person or organization obtaining a copy of the software and accompanying documentation covered by this license (the “Software”) to use, reproduce, display, distribute, execute, and transmit the Software, and to prepare derivative works of the Software, and to permit third-parties to whom the Software is furnished to do so, all subject to the following:

The copyright notices in the Software and this entire statement, including the above license grant, this restriction and the following disclaimer, must be included in all copies of the Software, in whole or in part, and all derivative works of the Software, unless such copies or derivative works are solely in the form of machine-executable object code generated by a source language processor.

THE SOFTWARE IS PROVIDED “AS IS”, WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE AND NON-INFRINGEMENT. IN NO EVENT SHALL THE COPYRIGHT HOLDERS OR ANYONE DISTRIBUTING THE SOFTWARE BE LIABLE FOR ANY DAMAGES OR OTHER LIABILITY, WHETHER IN CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

Expat

http://www.jclark.com/xml/expat.html

Expat License. Copyright (c) 1998, 1999, 2000 Thai Open Source Software Center Ltd

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the “Software”), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions:

The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED “AS IS”, WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

FastDelegate

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CODE PROJECT OPEN LICENSE (“LICENSE”). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED.

BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HEREIN, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. THE AUTHOR GRANTS YOU THE RIGHTS CONTAINED HEREIN IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS. IF YOU DO NOT AGREE TO ACCEPT AND BE BOUND BY THE TERMS OF THIS LICENSE, YOU CANNOT MAKE ANY USE OF THE WORK.
Definitions. “Articles” means, collectively, all articles written by Author which describes how the Source Code and Executable Files for the Work may be used by a user.

“Author” means the individual or entity that offers the Work under the terms of this License.

“Derivative Work” means a work based upon the Work or upon the Work and other pre-existing works.

“Executable Files” refer to the executables, binary files, configuration and any required data files included in the Work.

“Publisher” means the provider of the website, magazine, CD-ROM, DVD or other medium from or by which the Work is obtained by You.

“Source Code” refers to the collection of source code and configuration files used to create the Executable Files.

“Standard Version” refers to such a Work if it has not been modified, or has been modified in accordance with the consent of the Author, such consent being in the full discretion of the Author.

“Work” refers to the collection of files distributed by the Publisher, including the Source Code, Executable Files, binaries, data files, documentation, whitepapers and the Articles.

“You” is you, an individual or entity wishing to use the Work and exercise your rights under this License.

Fair Use/Fair Use Rights. Nothing in this License is intended to reduce, limit, or restrict any rights arising from fair use, fair dealing, first sale or other limitations on the exclusive rights of the copyright owner under copyright law or other applicable laws.

License Grant. Subject to the terms and conditions of this License, the Author hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to use the standard version of the Source Code or Executable Files in any way to create a Derivative Work, provided that You insert a prominent notice in each changed file stating how, when and where You changed that file.

You may distribute the standard version of the Executable Files and Source Code or Derivative Work in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution.

The Articles discussing the Work published in any form by the author may not be distributed or republished without the Author’s consent. The author retains copyright to any such Articles. You may use the Executable Files and Source Code pursuant to this License but you may not repost or republish or otherwise distribute or make available the Articles, without the prior written consent of the Author.

You may otherwise modify Your copy of this Work (excluding the Articles) in any way to create a Derivative Work, provided that You insert a prominent notice in each changed file stating how, when and where You changed that file.

The Articles discussing the Work published in any form by the author may not be distributed or republished without the Author’s consent. The author retains copyright to any such Articles. You may use the Executable Files and Source Code pursuant to this License but you may not repost or republish or otherwise distribute or make available the Articles, without the prior written consent of the Author.

Any subroutines or modules supplied by You and linked into the Source Code or Executable Files this Work shall not be considered part of this Work and will not be subject to the terms of this License.

Patent License. Subject to the terms and conditions of this License, each Author hereby grants to You a perpetual, worldwide, non-exclusive, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, import, and otherwise transfer the Work.

Restrictions. The license granted in Section 3 above is expressly made subject to and limited by the following restrictions: You agree not to remove any of the original copyright, patent, trademark, and attribution notices and associated disclaimers that may appear in the Source Code or Executable Files.

You agree not to advertise or in any way imply that this Work is a product of Your own.

The name of the Author may not be used to endorse or promote products derived from the Work without the prior written consent of the Author.

You agree not to sell, lease, or rent any part of the Work. This does not restrict you from including the Work or any part of the Work inside a larger software distribution that itself is being sold. The Work by itself, though, cannot be sold, leased or rented.
You may distribute the Executable Files and Source Code only under the terms of this License, and You must include a copy of, or the Uniform Resource Identifier for, this License with every copy of the Executable Files or Source Code You distribute and ensure that anyone receiving such Executable Files and Source Code agrees that the terms of this License apply to such Executable Files and/or Source Code. You may not offer or impose any terms on the Work that alter or restrict the terms of this License or the recipients’ exercise of the rights granted hereunder. You may not sublicense the Work. You must keep intact all notices that refer to this License and to the disclaimer of warranties. You may not distribute the Executable Files or Source Code with any technological measures that control access or use of the Work in a manner inconsistent with the terms of this License.

You agree not to use the Work for illegal, immoral or improper purposes, or on pages containing illegal, immoral or improper material. The Work is subject to applicable export laws. You agree to comply with all such laws and regulations that may apply to the Work after Your receipt of the Work.

Representations, Warranties and Disclaimer. THIS WORK IS PROVIDED “AS IS”, “WHERE IS” AND “AS AVAILABLE”, WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES OR CONDITIONS OR GUARANTEES. YOU, THE USER, ASSUME ALL RISK IN ITS USE, INCLUDING COPYRIGHT INFRINGEMENT, PATENT INFRINGEMENT, SUITABILITY, ETC. AUTHOR EXPRESSLY DISCLAIMS ALL EXPRESS, IMPLIED OR STATUTORY WARRANTIES OR CONDITIONS, INCLUDING WITHOUT LIMITATION, WARRANTIES OR CONDITIONS OF MERCHANTABILITY, MERCHANTABLE QUALITY OR FITNESS FOR A PARTICULAR PURPOSE, OR ANY WARRANTY OF TITLE OR NON-INFRINGEMENT, OR THAT THE WORK (OR ANY PORTION THEREOF) IS CORRECT, USEFUL, BUG-FREE OR FREE OF VIRUSES. YOU MUST PASS THIS DISCLAIMER ON WHENEVER YOU DISTRIBUTE THE WORK OR DERIVATIVE WORKS.

Indemnity. You agree to defend, indemnify and hold harmless the Author and the Publisher from and against any claims, suits, losses, damages, liabilities, costs, and expenses (including reasonable legal or attorneys’ fees) resulting from or relating to any use of the Work by You.

Limitation on Liability. EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT WILL THE AUTHOR OR THE PUBLISHER BE LIABLE TO YOU ON ANY LEGAL THEORY FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES ARISING OUT OF THIS LICENSE OR THE USE OF THE WORK OR OTHERWISE, EVEN IF THE AUTHOR OR THE PUBLISHER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Termination. This License and the rights granted hereunder will terminate automatically upon any breach by You of any term of this License. Individuals or entities who have received Derivative Works from You under this License, however, will not have their licenses terminated provided such individuals or entities remain in full compliance with those licenses. Sections 1, 2, 6, 7, 8, 9, 10 and 11 will survive any termination of this License.

If You bring a copyright, trademark, patent or any other infringement claim against any contributor over infringements You claim are made by the Work, your License from such contributor to the Work ends automatically.

Subject to the above terms and conditions, this License is perpetual (for the duration of the applicable copyright in the Work). Notwithstanding the above, the Author reserves the right to release the Work under different license terms or to stop distributing the Work at any time; provided, however that any such election will not serve to withdraw this License (or any other license that has been, or is required to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

Publisher. The parties hereby confirm that the Publisher shall not, under any circumstances, be responsible for and shall not have any liability in respect of the subject matter of this License. The Publisher makes no warranty whatsoever in connection with the Work and shall not be liable to You or any party on any legal theory for any damages whatsoever, including without limitation any general, special, incidental or consequential damages arising in connection to this license. The Publisher reserves the right to cease making the Work available to You at any time without notice.

Miscellaneous
This License shall be governed by the laws of the location of the head office of the Author or if the Author is an individual, the laws of location of the principal place of residence of the Author.

If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this License, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.
No term or provision of this License shall be deemed waived and no breach consented to unless such waiver or consent shall be in writing and signed by the party to be charged with such waiver or consent.
This License constitutes the entire agreement between the parties with respect to the Work licensed herein. There are no understandings, agreements or representations with respect to the Work not specified herein. The Author shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Author and You.
